

# 6-Port Gigabit PoE Switch with 4 Gigabit PoE Ports

OP-S4E2G

Shenzhen Optostar Optoelectronics Co., Ltd

2013. 05(Version 2)

#### Overview

The built-in two Gigabit uplink ports provide fast connection to servers or the backplane of the gigabit speed. The effective connectivity of the four 10/100/1000Mbps ports, allows growing business networks, classrooms and workgroups to obtain benefits from the demand for superior performance and sustain network expansion. This high-performance switch features with non-blocking, wire-speed switching, and 8.8Gbps switching capacity. All RJ45 ports can auto adjust the highest connection speed for a normal working.

This cost-effective OP-S4E2G provide network layout need to simplify wireless access point (AP) and IP-based surveillance cameras network cameras in order to install in commercial network and home network. The devices far away from power socket are very suitable for hanging on the wall or ceiling. PoE eliminates the need for connecting these devices to power socket. So it make more flexible for those difficult to connect with AC power socket, and cut down the installation cost. It is ideal choice for those want to deploy a small commercial network and home network that use wireless access point (AP) and IP-based surveillance cameras.

#### **Prduct Features**

- Supply power to 5 classes Ethernet wireless access point (AP) and network surveillance cameras
- Port 3 to port 6 compatible with IEEE802.3af standard power
- supply (Maximum power of each port is 15.4W)
- ➢ 4x 10/100 /1000Mbps automatic adjustment RJ45 ports
- Meets the standards of the IEEE 802.3 /IEEE 802.3u/IEEE 802.3z and IEEE 802.3ab
- Flow Control Type: Full duplex adopts IEEE 802.3x standard, half duplex adopts back pressure standard
- Auto-flip ports (Auto MDI/MDIX)
- Network port has lighting-proof function (AC power port: differential mode +/-2kV, common mode +/-4kV)
- Maximum PoE Power: 60W (all PoE ports, port 3 to port 6)
- Store-and-forward architecture, 192K forwarding memory
- > All ports support wire-speed switching, frame size within the range of 64 to 1536 can achieve wire-speed
- Wall-mounted design, easy to install and use
- Automatic adjustment, plug and play, no need software and protocol conversion

# **Product Size**

### Application

### Order Information

Model	Description	
OP-S4E2G	4x Gigabit PoE ports+2x Gigabit Uplink ports PoE switch, among which port 3 to port 6 supports POE IEEE 802.3af international standard, each port power is 15.4W, the whole power is 60W. Switch power adapter is external.	
Note :Default PoE power supply type is end-span (1/2, 3/6 line pair), mid-span(4/5, 7/8 line pair) optional		

#### Package include

No	Package List
1	6 Ports PoE Switch with 4 Gigabit AF PoE Ports (OP-S4E2G)
2	Power Adapter
3	User Guide
4	Warranty Card

# **Important Notice**

Performance figures, data and any illustrative material provided in this data sheet are typical and must be specifically confirmed in writing by OPTOSTAR before they become applicable to any particular order or contract. In accordance with the OPTOSTAR policy of continuous improvement specifications may change without notice.

The publication of information in this data sheet does not imply freedom from patent or other protective rights of OPTOSTAR or others. Further details are available from any OPTOSTAR sales representative.
